19"/6 Mediaconverter
MC701

The MC701 is a gigabit Ethernet media converter in a compact and rugged design. It is designed to withstand the most extreme environments over the long haul. The MC701 can be powered by dual USB ports (minimum 800mA together) or by 10-32V for increased versatility.

Mounting

MC701 is designed as a 19"/6 units and can be mounted together in several different ways:

- Standalone unit
- Two or more devices can also be stacked on top of each other
- Three 19"/6 units can be mounted together into one 19/2" unit
- Six 19"/6 units can be mounted together into one 19" unit

Guaranteed performance

Our products always come with lifetime support to ensure your equipment maintains peak performance for many missions to come.

Technical Specification	
Description	Converts between Ethernet copper and fiber (Tyco PRO BEAM® mini)
Ports	1 x LAN RJ45 (1000 Mbps*) 1 x LAN Fiber Tyco PRO BEAM® mini, Single Mode (1000Mbps, 1310 nm) 1 x DC In 5V (Binder) 1 x DC In 10-32V DC (ITS)
Led	Status LED and RJ45 LED.
Power Consumption	< 4W
Dimensions	73x140x44 mm (W x D x H)
Weight	0,7 kg
Certification	Designed to meet IP54, MIL-STD-810F and MIL-STD-461F
Other	No Fans

* can be configured to 10/100/1000 Mbps
