# Mini Mediaconverter MC6

The space saver

The Mini Mediaconverter keeps you connected while taking up exceptionally little space. You don't have to make room for another power cord either as it being powered directly via USB. And you can depend on its performance in any weather as it's designed to withstand the most extreme environments over the long haul.

Guaranteed performance
Our products always come with lifetime support to ensure your equipment maintains peak performance for many missions to come.

Technical Specification	
Description	Converts between Ethernet 10BaseT/100BaseTx "twisted pair" and fiber (SC or ST connector)
Ports	Fiber interface: Duplex SC 1300 nm (62,5 µm fiber) 100Mbps Copper interface: RJ45 connector 10BaseT/100BaseTx Power: 5V DC in (cable for USB port included)
Led	10BaseT link, 100BaseTx link Fiber link
Power Consumption	<100 mA (5 V)
Compability	Ethernet IEEE 802.3 Link distances up to 2 km
Environmental specification; Design to meet	Operating: -20 °C to +50 °C
Option	Also available in a 850 nm version.
