

# Flex Bay

With the new Flex Bay you can customize the Rocky notebooks to various types of demands and applications. The standard modules for the Flex Bay will hold either a CD/DVD drive, a 2<sup>nd</sup> hard drive or a 2<sup>nd</sup> battery. The Flex Bay holds signals for SATA, USB, PCIe, GB LAN and COM ports, which means that many different modules can be developed. Example of possible modules are: radio modules, satellite radio modules, fiber LAN modules, Serial or USB modules, or any other module that can utilize the signals available. Since the notebook will stay the same the many different Flex Bay modules will provide you with a very flexible platform. Flex Bay is available for all Rocky 9-series notebooks (RT, RK and RF).

## Technical Specification

Flex Bay	2 x Gbit LAN
(available signals out)	2 x COM-ports
	1 x Full RS232/RS485
	1 x Tx / Rx
	USB
